Number of meetings held to organise the program	Details of the meetings
4- 5	To discuss the conduct of the session

BRIEF INTRODUCTION AND DISCUSSIONS DURING THE SESSION

The session started with the students introducing their course followed by a brief introduction to the concept of reprogramming of mind. The concept of reprogramming your mind refers to the process of consciously and intentionally changing your thoughts, beliefs, and patterns of thinking to create a more positive and empowering mindset. It involves recognizing and challenging negative or limiting beliefs and replacing them with more supportive and beneficial ones.

Activities conducted to relate with the concept -

1. Magnet - students kept their hands in the air, palms facing each other with some gap between them. The students were asked to concentrate by closing their eyes and repeating "Magnet Magnet Magnet" non verbally. By the end of this activity, no space was left between the palms and both the palms were touching each other. This teaches controlling one's own mind, helps in yoga, meditation and manifestation.

2. The second activity gives a message of positive affirmation. Positive affirmations are powerful statements that help to reframe and reprogram one's thought beliefs and self-perception. For this activity the students were asked to tear a sheet of paper, take a pen and close their eyes. Sumeet Sir addressed the participants and before starting the session to energize the students he made them do his special **Wow Clap**. The first game which he played was **Magnet Trick** where the students were told to close their eyes and keep their hands parallel to each other and after a few minutes the hands of the students automatically became joint. This activity was done to demonstrate that even though the hands are not a magnet but still get joined because the students were subconsciously thinking that their hands are like a magnet. The second activity was called **Follow the Instructions** where Sumeet Sir asked the students to take a blank paper and a pen after which the students have close their eyes and draw a line of 2.8 cm and then fold the paper into half and after folding the paper draw a circle with radius of 0.5 cm and in the circle draw a triangle and again fold the paper into half and after folding the paper write their favorite actor's name and again fold the paper and write their favorite actress' name and then folding for the last time write their favorite food.

The result of this activity was that the message which Sumeet Sir gave and the message which the last student participant received were completely different. This activity explained how a message gets lost between communicators. Fourth activity was called **Heads up and Heads down** in which the students were asked to form a circle and on the instruction of Sumeet Sir had to look into each other's eyes and the students getting distracted were eliminated. The fifth activity was **I am Robot** in which there were a total of three teams each with three participants, one participant from each team was blindfolded and the other two participants instructed them to get to the finish line.

Sumeet Sir concluded his session with his last activity called **Opposite Distracts**, in this activity the students had to form a circle and on the instruction of Sumeet Sir, the students had to jump in or jump out and raise their right or left hand. The activity had three different levels and the instructions got difficult with each level.

published research on a topic. It should give an overview of current thinking on the theme and, unlike an original research article, won't present new experimental results. The structure of the review report varies between journals. Some follow an informal structure, while others have a more formal approach.

While speaking on the topic of mandatory requirement for writing research articles from reviewer point of view, Sir stated that the publisher-editor and the writer of the article are vicariously liable, for what they have written in the article. Sir explained in detail the mandatory requirement to write a review article, which includes:

1. To provide a comprehensive foundation on a topic
2. To explain the current state of knowledge
3. To identify gaps in existing studies for potential future research
4. To highlight the main methodologies and research techniques.

Amplifying on this topic he lastly said that now the reviewers have to give mandatory article while reviewing the article. The students were attentively listening to the topics covered by the Guest-Speaker due to which various questions were being raised during the Q&A session which was being effectively answered by the esteemed guest speaker Dr. Indrajit Ghosal. The Q&A session was conducted by Ms. Priyal Shah. The Webinar was concluded with a vote of thanks delivered by Ms. Gargi Deb.

of Blockchains and Web3 and also about the future perspectives of the same. Further, another team member of Aashish Sir helped us follow the certain steps and install an application called D'Cent Wallet in which they will be transferring some minimum amount in individual students' applications and also made the students download a set of files. The purpose of installing the D'Cent Wallet application was to teach the participants how we can link with a hardware wallet or use it as a software wallet without hardware. A task related to the set of files was provided to every participant which was, every participant had to transfer 500 documents from those files to a particular place. This task was very helpful to the participants as the documents contained knowledge of different sectors such as their Affidavits, Applications, Arbitration and Conciliation Act, 1996, Bails, Bonds, Labour law agreements, Marriage related agreements, Criminal law related application and agreements and many other things. This task was very helpful and knowledgeable for every participant. This was the task assigned after the completion of which only Certificates would be provided to all the participants. Overall this Session consisted of all these exercises and tasks and lastly the session was concluded by thanking the Respected Adv. Aashish Baphana Sir and the whole team.
